

Edwards Concrete blends art and concrete to achieve award-winning results that are as visually stunning as they are eco-friendly and sustainable. Since 1982 we have completed hundreds of decorative concrete designs including polished interior floors, to exterior concrete walkways, curbs and poolside hardscapes for retail stores, commercial builders and architects throughout the state of Florida and the US South Eastern regions.

Since 1982 we have completed hundreds of decorative concrete designs for retail, commercial and theme park projects.

Sea World

Seat walls which match the exposed Aggregate Walkways

Marriott Grande Vista Resort

A variety of colors used with color hardeners

Caribe Royale Resort

**Placed with black integral concrete , with a black hardener and
a black form release**

The Church of Jesus Christ of Latter Day Saints Windermere, Florida

The original walkway around the building was made of concrete pavers. Over time, the weight of the lift which was used to pressure wash the massive building destroyed the paver walkway.

This is where David Edwards, president and owner of Edwards Concrete Company, an official Bomanite Franchise Partner, was brought into the plans. With over 25 years of experience in the concrete business, and since Mr. Edwards had done some work for LDS Temple in the past, he was the right man for the job.

It was decided that a product made from a South Florida concrete mix composed of ground lime rock would be used for the 27,000 square feet of walkway surrounding the Temple. Edwards Concrete worked for two weeks doing samples to make sure the right look and strength was achieved for this project.

Edwards Concrete Company completed the 27,000 square feet of walkway April 11, 2008. The project was started on January 9, 2008, and over 750 cubic yards of concrete and 34 tons of steel were placed and installed.

Edwards Concrete Company was presented the Eagle Award for this project by the Associated Builders and Contractors, Inc. in 2008. It is also featured on the cover of Florida Concrete Magazine, March 2008, and an article in Concrete Décor, Feb. 2009.
